

ARENA-HARROWS

With Bolt-On Teeth

RHB SERIES ARENA-HARROWS

Ideal for horse arenas and racetrack applications. A low profile harrow that rotates in a crisscross fashion to provide complete harrow coverage. The unique turning action allows the harrow to level soil by redistributing it inward. Available in 5', 6', 7', and 8' diameter models for tractors with Category 1, 3-point hitches. The heavy-duty 5 spoke rings are constructed of 2" x 2" tubing and equipped with 3/4" x 8" angled replaceable spiked teeth to provide trash clearance.
