Offset in-line slope mowers

• Agriculture • Green areas • Tractors from 70 to 80 HP

Strong points

Floating frame: the joint pin on tractor side allows the head system to follow the ground, protecting the arms structure of the parallelogram.

Hydraulic sideshift ram fitted within parallel arms for better protection during work.

Gearbox unit inside the transmission cover (more-side sliding). Rear adjustable roller ø 5 1/2".

The gearbox position located outside of the transmission cover allows greater off-set of the flail head reducing the Pto shaft angle in work (only ZTE).

Rotor internal sealed bearings.

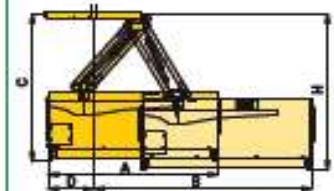

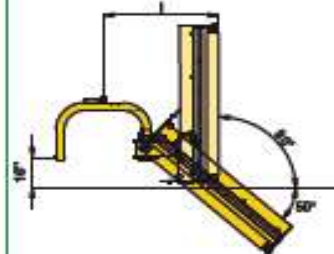

Mechanical breakaway

Cable controls with floating head (optional).

Work position

- In-slope
- Vertical
- Offset
- In-line
